

# ONLINE NOTES GALLERY

Department Of Computer Science and Engineering, North South University,Dhaka

## Let's Introduce

Online Notes Gallery is a website for online notes management where you can upload different notes for different subjects from your profile and download different subject's notes which is uploaded by other users.

## Objective

- To reduce manual paperwork.
- Reduced sharing and distribution time.
- Increased reliability.
- Increased operational efficiency.
- Data security.

## Tools and Technologies

### Tools:

- Xampp
- Atom

### Technologies:

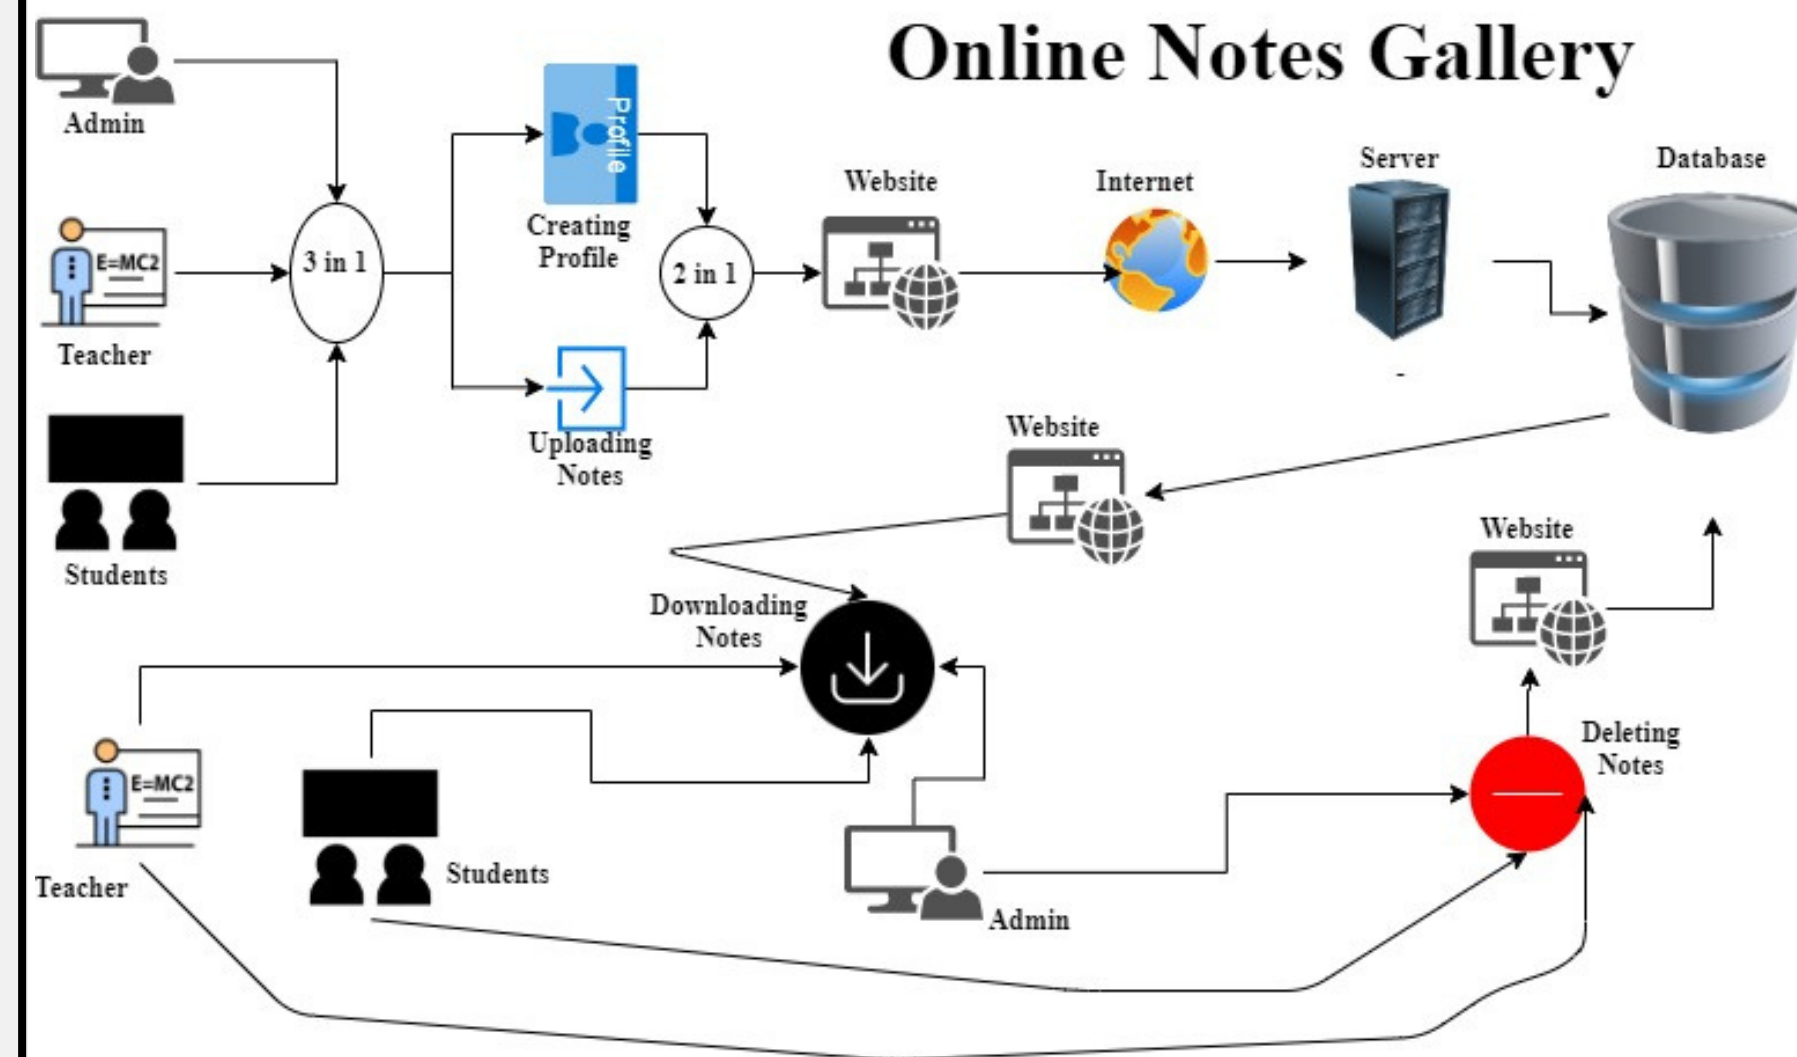

- PHP
- SQL
- HTML
- CSS
- Javascript

## Users

- Students.
- Teachers.
- Administrators.

Students and Teachers can create their a-ccounts and start viewing notes shared by other users as well as upload their own notes. Administrator is must be an authorized user who will keep track of all the uploaded notes and manage users as well through the admin panel. New features can be added to the system as per requirements.

## Plan for future Implementation

We have a plan to release a premium version of this website which will be dedicated to a particular school, college or university with a premium hosting address. If we can add some extra creative features for the premium version, we can design it for different institutions regarding their needs. Web and app development is a huge market and commercializing any needy thing here is actually easy with right advertising and marketing policy. In our mind this can be future improvement.
